

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, August 20, 2013 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Moderate (262 new fires)
New large fires:	8 (*)
Large fires contained:	3
Uncontained large fires: **	48
Area Command Teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	10
Type 2 IMTs committed:	21

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft from the 153<sup>rd</sup> Airlift Wing, Cheyenne (Wyoming Air National Guard) and one from the 302<sup>nd</sup> Airlift Wing, Colorado Springs (Air Force Reserve) are supporting wildland fire suppression operations out of Boise, ID. Two MAFFS from the 146<sup>th</sup> Airlift Wing (California Air National Guard) are supporting wildland fire suppression operations out of Channel Islands Air National Guard Station, CA.

**Eastern Great Basin Area (PL 5)**

New fires:	43
New large fires:	0
Uncontained large fires:	11
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Beaver Creek**, Twin Falls District, BLM. IMT 1 (Lund) and IMT 2 (Kidd). One mile east of Hailey, ID. Timber, brush and grass. Active fire behavior with crowning and spotting. Power lines and numerous structures threatened. Evacuations and area closures in effect.

**Little Queens**, Sawtooth NF. IMT 2 (Wilde). Six miles northwest of Atlanta, ID. Timber. Active fire behavior with crowning. Community of Atlanta threatened. Evacuations in effect.

**Patch Springs**, Salt Lake Field Office, BLM. IMT 2 (Dunford). Two miles northwest of Terra, UT. Timber, juniper and grass. Creeping and smoldering with single tree torching. Structures and power lines threatened.

**Elk Complex**, Boise NF. IMT 1 (Harvey). Ten miles southwest of Pine, ID. Timber, brush and grass. Creeping and smoldering with short-range spotting. Numerous structures threatened. Road and area closures in effect.

**Millville**, Bear River Area, Utah DOF. Six miles southeast of Logan, UT. Timber and grass. Creeping and smoldering with torching. Numerous structures threatened. Evacuations in effect.

**Thunder City**, Payette NF. Previously reported incident. Four miles northeast of Stibnite, ID. Timber. Crowning with spotting. Last report unless significant activity occurs.

**Juni**, Boise District, BLM. Thirty-three miles southeast of Jordan Valley, OR. Juniper, brush and grass. Creeping with single tree torching. Structures threatened. Road closures in effect.

**North Fork**, Boise NF. Twenty miles southeast of Cascade, ID. Timber. Creeping and smoldering with isolated torching. Area closures in effect.

**State**, Bear River Area, Utah DOF. Eight miles west of Portage, UT. Timber, brush and grass. Creeping and smoldering with isolated torching. Residence threatened.

**Lodgepole**, Salmon-Challis NF. Ten miles west of Challis, ID. Timber and brush. Interior burning.

**222**, Richfield Field Office, BLM. Fifteen miles southwest of Eureka, UT. Timber and grass. Smoldering.

**Rockport**, Northwest Area, Utah DOF. Ten miles northeast of Park City, UT. Brush and grass. No new information.

**Predictive Services Discussion:** Scattered thunderstorms will form over much of the Great Basin, the Southwest, and the central Rockies. Most storms will produce some rainfall, with some parts of Utah and Nevada receiving heavy rain. Widely scattered thunderstorms will also form over the California mountains. Isolated thunderstorms will move into southern Idaho and western Wyoming late in the day. Breezy conditions will develop in the northern Rockies. Scattered showers and thunderstorms will continue over the Southeast. Temperatures will remain very warm to hot in the West and Plains and warm in the East.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

# RETARDANT, PARACARGO & WATER DROP SAFETY

## Aviation Category

Having retardant (jell, foam), paracargo, and water dropped on a fire should be a routine event. However, there are risks associated drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

- Be aware of the location and flight patterns (final approach, drop zone, exit) of aircraft during drop operations.
- Be sure you have positive contact with the pilot before the drop.

All persons, vehicles, and animals should be cleared from the danger zone prior to the arrival of the aircraft.

Beware of “streamers” or parachutes that don’t open.

- Personnel can be injured by the impact of material dropped by aircraft. Clear personnel out of the target area when the drop is conducted. If an individual is caught unaware in a drop zone:
  - Hold your hand tool away from your body.
  - Lie face down with hardhat in place and head toward the oncoming aircraft.
  - Grasp something firm to prevent being carried or rolled about by dropped liquid.
  - Do not run unless escape is ensured.
  - Get clear of dead snags and tops.
  - Be aware of rolling debris below the drop site in steep terrain.
- Working in an area covered by retardant should be done with caution due to slippery surfaces.
- If possible, wash the retardant off your skin to prevent irritation.
